Ezy-Wash[®] CP-BS Lead Safe[™] Wall Mounted No Stop Pre-Rinse Unit Type 80 FI Inlet

Item Code	Description	WELS Rating	Water Consumption	Nominal Flow Rate	Outlet
181.17.05.00	Ezy-Wash [®] CP-BS Lead Safe™ Wall Mounted No Stop Pre-Rinse Unit Type 80 FI Inlet - Std	6	4.5	3.4	Trigger Spray
181.17.05.03	Ezy-Wash [®] CP-BS Lead Safe™ Wall Mounted No Stop Pre-Rinse Unit Type 80 FI Inlet - Pot Filler	*6	4.5	3.4	Trigger Spray & Pot Filler

SPECIFICATIONS

- Galvin Engineering recommends the installation of strainers and pressure reducing valves prior to
 installing the pre-rinse unit to ensure clean consistent water supply. Debris or poor water quality could
 cause the trigger to seize or fail to seal.
- This pre-rinse unit has a 6 star WELS rating, the pot filler attachments are 0 star to allow fast pot filling.
- Lead Safe[™] brass construction*

IMPORTANT: All Ezy-Wash[®] Pre-Rinse taps are tested in accordance with AS/NZS 3718 and leave our premises in good working order.

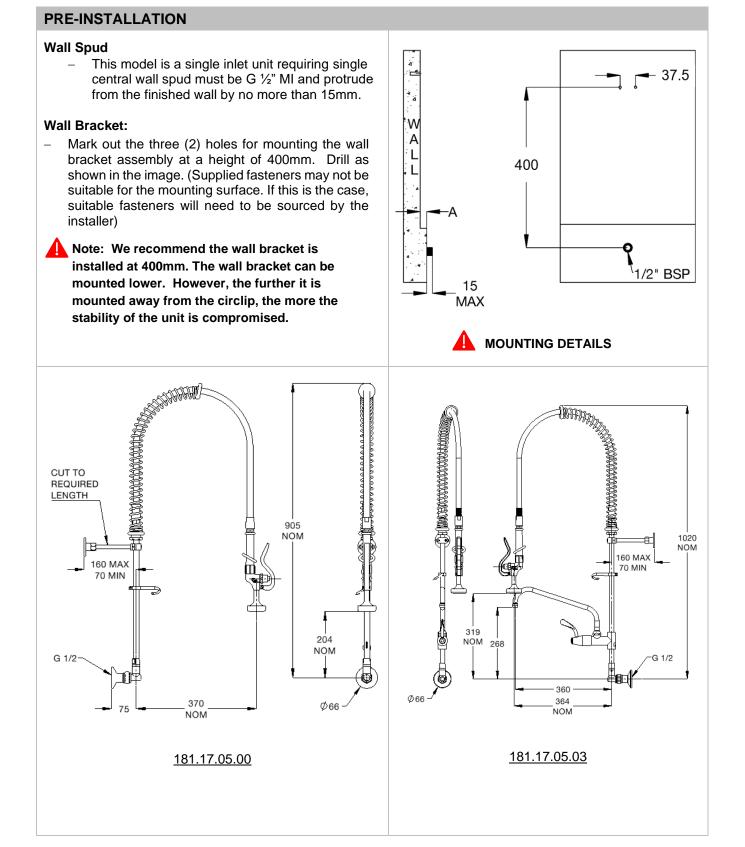

*Our Lead Safe™ product range is compliant with the Lead Free Requirements of the NCC 2022 Vol. Three, Clause A5G4(2) and NSF/ANSI 372. **Any flow controller incorporated in the outlet to be tightened to prevent removal by hand. As Per AS3718.

WARNINGS: Special attentions to be paid on notes, photos, images, or drawings of assembly steps marked with the warning symbol.

TOOLS REQUIRED

Adjustable spanner

Power drill

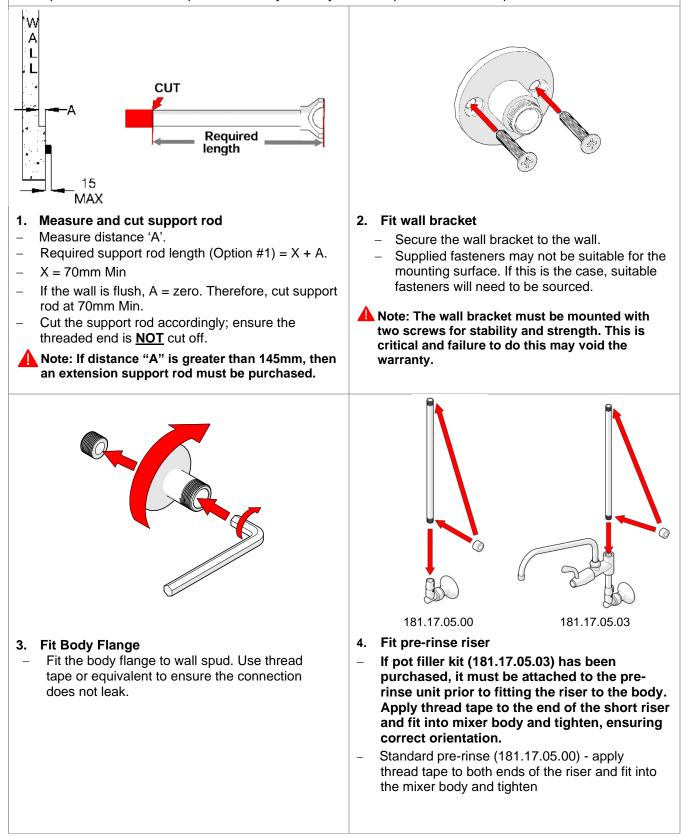

Hex key

_

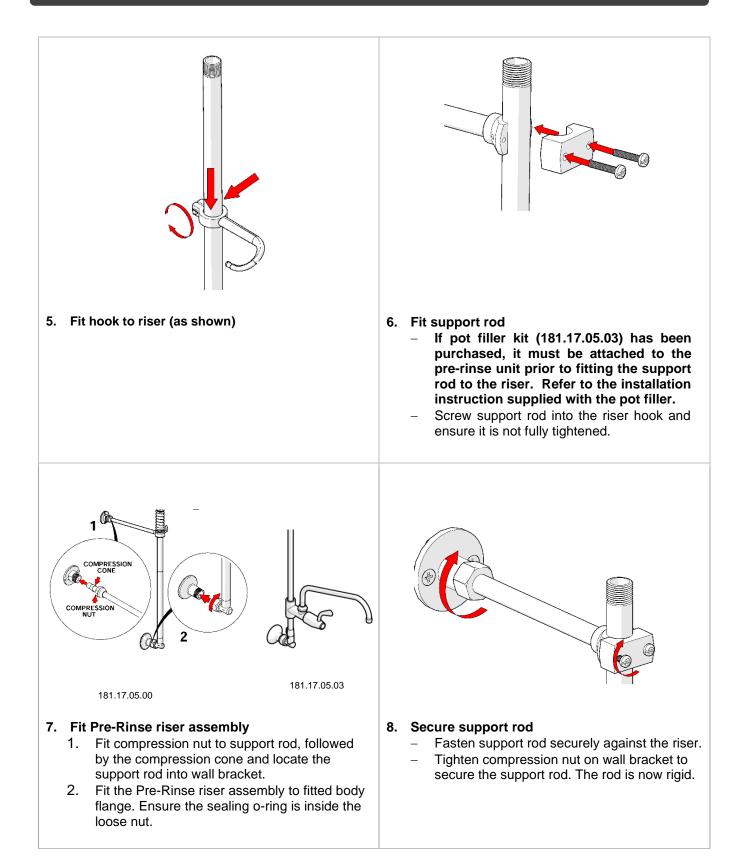

Thread tape / Sealant

INSTALLATION

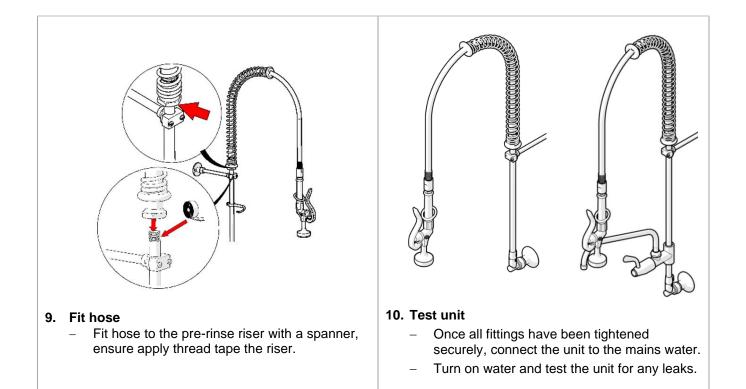

INSTALLATION COMPLIANCE: Galvin Engineering products must be installed in accordance with these installation instructions and in accordance with AS/NZS 3500, the PCA and your local regulatory requirements. Water and/or electrical supply conditions must also comply to the applicable national and/or state standards. Failing to comply with these provisions shall void the product warranty and may affect the performance of the product.

Product Installation Guidelines

Product Installation Guidelines

WARNINGS

For optimum performance it is recommended that the isolation or mains taps are turned off whilst the unit is not in use (overnight etc.), so that the unit is not under mains pressure when unsupervised. Flood damage may occur if a failure occurs whilst the unit is under mains pressure (warranty is void in this instance).

Galvin Engineering recommends that the handpiece is periodically serviced by a qualified plumber.

IMPORTANT:

To seal the hose this unit uses Loctite 577 which is a thread sealant approved for use with potable water (AS/NZS 4020). If hose is to be removed for maintainance purposes, reseal the joints with Loctite 577, or an equivalent sealant compliant with AS/NZS 4020. Do not use thread tape to seal the hose connections, as this may cause the hose nut to become loosened over time and leak.

WARRANTY

Galvin Engineering products are covered under our Manufacturer's Warranty. Galvin Engineering products must be installed in accordance with the installation instructions and in accordance with AS 3500 and NCC Volume Three, relevant Australian Standards and local authorities applicable to product being installed. Water and electrical supply conditions must also comply to the applicable national and/or state standards, failing to comply with these provisions may void the product warranty and affect performance of the product.

Please visit www.galvinengineering.com.au to view the full warranty, our Installation Compliance and Maintenance & Cleaning information as well as any other additional information.
