DIMENSIONS

INSTALLATION

INSTALLATION COMPLIANCE: *Galvin Engineering products must be installed in accordance with these installation instructions and in accordance with AS/NZS 3500, the PCA and your local regulatory requirements. Water and/or electrical supply conditions must also comply to the applicable national and/or state standards. Failing to comply with these provisions shall void the product warranty and may affect the performance of the product.*

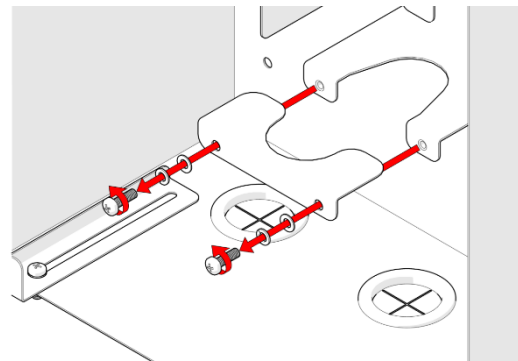

1. Measure & mark the cabinet mounting hole locations as per the *Dimensions* table. Remove the screws and front cover as shown.

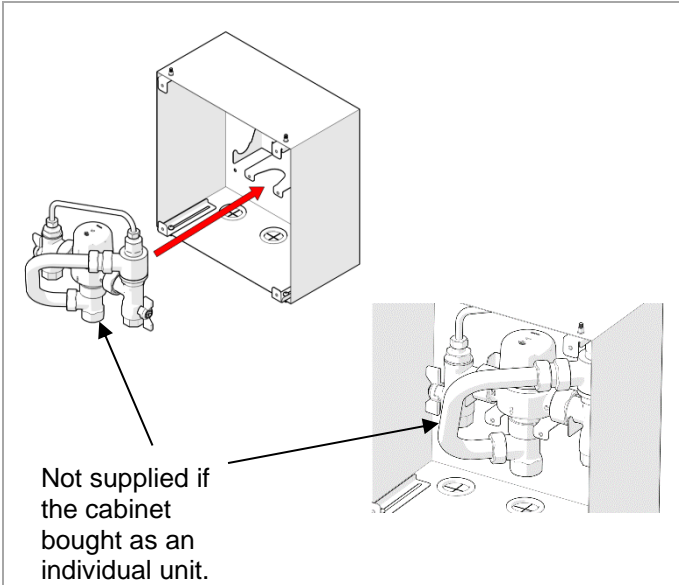

2. Secure cabinet to a wall using the 4 x Ø6mm holes as shown (fasteners not supplied).

3. Adjust the front cover brackets on all 4 corners to the distance required. A minimum of approximately 60mm out is required for the valve to fit correctly.

4. Remove screws, washers and valve bracket from the cabinet.

Not supplied if the cabinet bought as an individual unit.

5. Fit the valve as shown ensuring the valve is fully supported by the bracket.
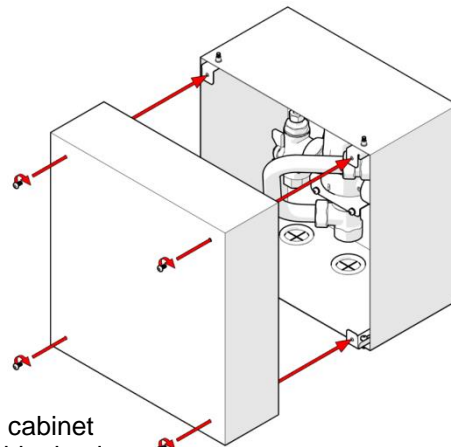

6. Fit screws, washers and valve bracket. Ensure the valve is secure and correctly supported.

Not supplied if the cabinet bought as an individual unit.

Not supplied

7. Connect inlets and outlet (not supplied with cabinet). Fit the front cover and screws.

WARRANTY

Galvin Engineering products are covered under our Manufacturer's Warranty.
