## EN Mounting Instruction

Please read and carefully follow these instructions. Find the product number on the product label and ensure that these assembly instructions match your product.

**WARNING:** Failure to comply with these instructions may result in accidents involving serious personal injury or the product being damaged.

**WARNING:** If you suspect that any individual parts may be damaged, contact your Pressalit dealer or service provider. Do not remove, attempt to repair or install parts yourself, unless directed to do so by Pressalit or its agents.

**WARNING:** No modification of this equipment is allowed without express authorization from Pressalit.

**WARNING:** These instructions must be followed, and the product must be installed professionally by a qualified person; e.g. a licensed plumber, in order to avoid personal injury or property damage while using the product.

**WARNING:** Pressalit cannot be held liable for injury to persons or damage to property caused by faulty mounting.

### Installation location

This product is designed for indoor use in a wet environment, such as a bathroom or washroom. It may only be used in an environment corresponding to the system's IP rating. Ensure that the installation location environment also complies with the following operating parameters of the product:

Environmental factor	Operating range
Temperature	-30°C to 80°C ( -22°F to 176°F)
Relative humidity	20% to 90% @ 30°C (86°F) (condensation free)
Atmospheric pressure	700 to 1060 hPa

**WARNING:** Medical electrical equipment needs special precautions regarding electromagnetic compatibility (EMC) and needs to be installed and put into service in accordance with the EMC information (provided in your product's operating instructions).

It is unlikely that the user will encounter problems with the product because of inadequate electromagnetic compatibility.

However, electromagnetic immunity is always relative and standards anticipate environments of usage. Portable and mobile RF communications equipment can affect medical electrical equipment. When the product is connected to the local mains power supply, we recommend the use of electromagnetic shielding and similar preventative measures to avoid conducted emissions.

When choosing an installation location, ensure that there will be adequate space for movement of—and access to—the product.

### Assembly and installation

Mount the product in accordance with the illustrations in this assembly instruction.

**WARNING:** External cables need to be fixed in such a way that users cannot stumble and injure themselves.

When using the product's nurse call button, ensure that the connected equipment complies with the applicable electrical safety regulations in its country of use.
